TIPS TO TAKE CONTROL OF AI IN YOUR BUSINESS

appetite.business

AI IS ALREADY IN YOUR BUSINESS

✅ Employees are already using AI tools—whether they're approved or not.

🚨 The risk? Data leaks, compliance issues, and security threats.

❓ The question is: Are you leading AI adoption or letting it happen in the shadows?

1

IDENTIFY SHADOW AI IN YOUR BUSINESS

🔍 Survey employees: What AI tools are they using?

⚠️ Assess risks: Are they inputting sensitive company data into public AI models?

🛠️ Audit software: Check which AI-powered apps and services are in use.

2

IMPLEMENT
APROVED AI TOOLS

✅ Provide secure, enterprise-grade AI.

💡 Microsoft Copilot integrates AI within Microsoft 365, keeping your data safe.

🚀 When employees have a trusted AI solution, they won't need risky alternatives.

3

EDUCATE YOUR TEAM ON AI BEST PRACTICES

🔑 Set clear guidelines for AI use in your company.

🔒 Teach employees about data security risks when using AI.

💡 Encourage innovation, but with safeguards in place!

4

AUTOMATE & OPTIMISE WORKFLOWS WITH AI

Use AI where it truly adds value:

- ✅ Automate repetitive tasks
- ✅ Improve customer interactions
- ✅ Enhance data analysis & reporting

💡 AI should enhance productivity—not create security headaches.

5

STAY AHEAD OF AI TRENDS

AI is evolving fast! Stay ahead by:

✅ Training teams on AI tools
✅ Keeping up with AI policies & compliance
✅ Using AI within secure business ecosystems like Microsoft 365
